# Creating Natural and Sustainable Landscapes

Native Plant Solutions (NPS) is a consulting branch of Ducks Unlimited Canada (DUC). We draw on over 70 years of wetland and native grassland knowledge, research and restoration experience. We use sound science to restore and create sustainable landscapes.

NPS was established by DUC in 2001 to provide science-based solutions for wetland and upland ecosystems across Canada. The key to our success lies in our experience in conserving, researching and managing wetland and upland habitat. The ability to do all three in-house puts NPS in the unique position to service the needs of a wide range of clients.

Our environmental solutions are based on natural processes and techniques related to wetland, aquatic and upland systems. We offer a range of services that include:

- Naturalized Stormwater Design, Construction and Management
- Native Grass Upland Establishment
- Remediation, Reclamation and Restoration of Altered Landscapes
- Green Roofs
- Environmental Services
- Knowledge Products

## Why Choose Native Plant Solutions?

- NPS uses natural processes and native vegetation to create, restore and remediate landscapes.
- NPS products and services are science-based, employing ecologically-sound best management practices.
- NPS uses adaptive management to optimize its activities, structure and direction to continually improve the products and services it provides, as well as your bottom line.
- NPS techniques provide high quality results that can withstand a variety of environmental conditions and provide immediate ecological benefits.
- NPS staff have vast experience in habitats across Canada.
- NPS manages projects from start to finish.

## Our Expertise

- NPS are native plant specialists experienced in applying natural solutions that are scientifically proven.
- NPS staff are specialists in the upland, wetland and aquatic and environmental sciences. They possess expertise in the specialties of wetland and native grassland ecology, agrology, soil science, site remediation, landscape architecture, avian biology and GIS technology.
- NPS employ cost-effective techniques that customize the appropriate habitat for your site's environmental conditions.
- NPS expertise is complemented by a broad array of biology, agrology, research and engineering specialists at Ducks Unlimited Canada.

*All net profits generated by NPS are returned to Ducks Unlimited Canada to further their work in conservation, habitat restoration and research.*
